10 days course - Academic year 2023-2024

# Challenges for Sustainable Management

July 1st-12th, 2024

## Programme outlines

Managers are facing major challenges in an ever-changing world. Academics and practitioners have pioneered innovative solutions to transform these challenges into opportunities in this transition period.

Our Summer School, dedicated to *Challenges for Sustainable Management*, offers a unique opportunity to deepen your understanding of the latest innovative solutions across different areas of management such as finance, human resources, supply chain, and more.

Embark on a transformative journey with an international cohort for 10 inspirational days, guided by our lecturers. Gain invaluable insights as you align theories and practices connecting with latest initiatives and innovations. This experience will heighten your awareness, equipping you to anticipate the transitions necessary to address sustainable challenges.

With more than just 36 hours of lectures, group work and field trips, you will discover the charming city of Rennes, the capital of Brittany. The adventure includes a tour to the must-see Mont-Saint-Michel Bay referred to as “The wonder of the Western world”.
